PROFILE

With a background in Environmental Science and a strong passion for problem-solving, I made a purposeful transition into software development in 2020. Over the past three years, I've worked as a full-stack developer, building robust and user-focused web and mobile applications using technologies like React, React Native, Node.js, and TypeScript. I take pride in delivering clean, maintainable solutions with a focus on quality, performance, and long-term value. I enjoy working in collaborative, cross-functional teams and take a structured, detail-oriented approach to both code and communication. Originally from Nigeria, I now live in Germany with my family and am committed to growing my career in dynamic, impact-driven tech environments.

SKILLS

Frontend React, React Native, Next.js, Storybook	Backend Node.js, Express.js, API Design	Programming Languages TypeScript, JavaScript, SQL, Golang
Dev Tools & Practices Docker, CI/CD, Jira, Test-Driven Development (TDD), Git	Soft Skills Leadership, Project Management, User Experience (UX), Product Thinking	

PROFESSIONAL EXPERIENCE

apomap GmbH 01/2025 – Present Winterberg, Germany	Team Lead, Full-stack Development apomap is a health tech startup (~10 employees) offering a digital logistics platform for pharmacies. I lead the engineering team in designing and scaling our SaaS product. My role involves guiding system architecture, driving product decisions alongside stakeholders, and ensuring timely delivery of high-impact features. I coordinate planning sessions, mentor developers, and conduct regular code reviews. My focus is on building maintainable systems that support user growth and operational efficiency. Key achievements: - Introduced architectural improvements that reduced technical debt and increased development velocity. - Helped define and deliver features that directly addressed user feedback, improving engagement and retention.
11/2022 – 12/2024 Winterberg, Germany	Fullstack Developer I built core product features across the web platform and backend using React, Firebase, Node.js, and TypeScript. I worked closely with designers, product leads, and external pharmacy partners to implement real-time features, improve workflows, and integrate third-party logistics (GLS, Mauve, ShopApotheke) and POS systems (awintaONE, ADG3000, pharmatechnik). Key achievements: - Contributed to a 20% increase in subscriptions by improving platform reliability and performance. - Implemented real-time updates and data-fetching optimizations using React Query and WebSockets.
09/2022 – 11/2022 Boston, MA (Remote)	MyCodeCareer Frontend Developer MyCodeCareer is an early-stage edtech platform helping junior developers grow their careers. I led a full website redesign focused on SEO, accessibility, and responsiveness. I worked directly with the founding team to improve user flows, optimize React performance, and drive engagement among learners and job seekers. Key achievements: - Increased web traffic by 50% through improved SEO and performance tuning. - Boosted user engagement by 25% through better UX and clearer navigation.

06/2022 – 07/2022
Bremen, Germany

Brainnest Consulting GmbH

Frontend Development Industry Training (Bootcamp)

Brainnest is a consultancy offering practical, project-based training in digital skills.

Participated in an intensive training program on modern frontend development, covering HTML, CSS, JavaScript, and React. Built responsive UIs from scratch, collaborated on team projects in an agile setup, and practiced version control workflows.

Key achievements:

- Developed and deployed several frontend components using React and Git workflows.
- Gained experience with code reviews, design implementation, and accessibility best practices.

06/2020 – 05/2022
Germany

Freelance & Personal Projects

Fullstack Developer (Self-taught)

During my transition into tech, I completed self-guided training in web development and worked on several freelance and personal projects. I built and maintained websites using WordPress, Elementor, React, and Node.js. I helped small businesses improve their online presence and experimented with data-driven apps and UI design.

Key achievements:

- Built and deployed multiple websites for local clients and personal use.
- Strengthened skills in full-stack development, responsive design, and CMS workflows.

01/2020 – 05/2020
Germany

Career Break

Due to COVID-19 Pandemic

Used this period for personal reflection and to prepare for a transition into the tech industry by exploring programming, online learning, and digital tools.

EDUCATION

09/2015 – 03/2019
Freiburg, Germany

M.Sc. Environmental Science

Albert-Ludwigs-Universität

Focus on data analysis, GIS, and environmental modeling. Developed strong analytical skills, working with structured research processes and scientific tooling (e.g., RStudio). Master's thesis and coursework emphasized experimentation and adaptive problem-solving, forming a foundation for my later career in tech.

12/2006 – 03/2011
Ile-Ife, Nigeria

B.Sc. Soil Science and Land Resources Management

Obafemi Awolowo University

Focused on soil science, agronomy, and environmental resource management. Built a solid foundation in scientific analysis, experimental design, and data collection through intensive field and laboratory work.

LANGUAGES

English — C2 | Native or Bilingual Proficiency • **German** — B2 | Professional Working Proficiency

PERSONAL PROJECTS

URL Analyzer

A full-stack web app for automated website analysis with real-time crawling, visual dashboards, and Docker deployment.

- Tech: React, Vite, TypeScript, Tailwind CSS, Go (Gin), MySQL, Docker, TanStack Query, Zustand.

Myndscape - Wellness & Journaling App

A mobile-first journaling app for mood tracking, built with React Native, glassmorphic UI, and Supabase backend.

KPI Bot - Stripe Metrics Dashboard

SaaS dashboard for real-time Stripe subscription metrics like MRR and churn, enabling transparent team insights.

- Tech: Next.js, TypeScript, Stripe API, Drizzle ORM, PostgreSQL, Recharts, Shadon UI.
